How to: Insert a dvd and play your videos.. Sony Vegas Pro 8.0b Build 217-AVCHD-MPG-AC3 Category:Audio editing software Category:Lighting software Category:Film and video technology Category:Video editing software Category:Video editing software for WindowsQ: Regex in python for a special scenario I have some sample inputs that I need to parse. Following is the sample input which I would expect to be parsed in the same way. "" "" "" I need the output in a form where I can get the below data. format: (tlts) date: 2013-08-07 author: 123 message: text message EDIT: I have tried the below code, (r"+") But it returns the below error. SyntaxError: EOL while scanning string literal It works fine if I remove the 'tlts' before format. A: Try to use raw string literals like this: >>> r"\s\*" ' 2d92ce491b
