In this article you will learn how to help you make the most of the power of the web to help you master the English language and we'll also dig into some other small tips and tricks to optimize your elearning experience. The fact that this technology is only in its infancy means that it still has many places to grow and has a lot of room to improve. Instead of just throwing at it - we'll try to provide you with some good advice that you can incorporate into your programs and most likely find really useful, like the ones below. The result is that your users will find it easier to learn, easier to use, and easier to remember. ? The more “english” your UI is, the more it will appeal to a global audience, the less boring it will seem, and the easier it will be to use and remember. ? In the unlikely event that your users get confused or frustrated by your UI, they will give up on the site and look for another site. ► How to make people love you (it's not rocket science). User testing is a great way to get your content to be both readable and interesting. You can do this by making sure that your text flows, is short and concise, and is visually appealing. The more consistent your UI is, the easier it will be for your users to navigate and interact with it. ► Avoid these 3 common mistakes that get users mad (and avoid them yourself). Lack of connection. There is a big difference between

providing information and giving users a connection to it. Users don't want to give you their information, they want to give it to you. Your users want to feel that they are interacting with a human being. They want to feel that you are listening to them and giving them valuable information. ► Going online, you've got a variety of ways to look for what you need. ? Keep your users busy for longer. Avoid using too many animations or moving graphics. ? If you have a great deal of content, make sure that you include notes, links and a magnifying glass. ? And, if
