adobe photoshop lightroom 5.2 final (32 bit) [chingliu] Adobe Photoshop Lightroom 5.2. Description: Lightroom combines photos into "collections" - virtual collections of files that can be quickly searched. It stores information about keywords, previews and metadata not in each graphic file, but in a centralized database (SQLite engine). Therefore, the database can also be contacted about the photographs that are now in the archive on DVD. The size of the program is significantly smaller than that of its predecessors, and the connection to the database is very fast. fffad4f19a
