Ah p'pa outubre, akoutobr de la vie, m' doutant, vous m' remercie. Sia Furler - Cheers to You feat. Jena Lee(2007).mp3 by habsutzer 2011 30er La Découverte 2009. . you have helped me a lot!! . thank you very much for your help. you have helped me a lot! . thank you very much for your help. . Jena Lee You're Beautiful Lyrics Maren Morris Lyrics Category:Discographies of American artists Category:Folk music discographies Category:Pop music discographiesThe invention relates to a highly sensitive one-time pressure switch having a light-emitting diode (LED), and having an electronic control and drive circuit. Pressure switches having a LED are known from German Patent Application No. DE 101 55 650 A1. German Patent Application No. DE 199 48 944 A1 discloses a pressure switch having a light-emitting diode and having an electronic control and drive circuit. In the prior art, the respective signals that indicate a pressure are converted into electronic signals by photoelectrically detecting the light emitted by the light-emitting diode. The converted electronic signals are amplified, and are evaluated by a microprocessor in order to be able to ascertain the position of the switch with high precision. The electrical contacts of the switch close, i.e., the switch is activated, when a pressure is applied to the switch. Depending on the design and on the size of the switch, the electrical contacts in the prior art are driven directly by the pressure applied to the switch. In this case, only a very small amount of contact force is required in order for the switch to close the electrical contacts. Depending on the design and on the size of the switch, the electrical contacts are designed as contacts in the form of balls or as contacts in the form of contact springs. A disadvantage of the prior art is that the electrical contacts must have a certain minimum contact force in order for the switch to reliably close. In the case of a pressure switch that closes when a pressure is applied to it, an effective drive mechanism of the electrical contacts is not provided. A drive mechanism for the electrical contacts would be required, and this would considerably increase the overall size of the
