References Category:Backup softwareQ: Confused about printing from one function to a list and then from that list to another function I'm a newbie with Python and I'm having some problems with my code. Basically, I have a list of words. Each word has a score, and I am trying to find the best (most score) word. Here is my code so far: def myfunct(): list_one = ['a','b','c','d','e','f','g','h','i','j','k','l','m','n','o','p','q','r','s','t','u','v','w','x','y','z'] words_list =[] for word in list_one: if (word.isupper()): list_two = [1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,1,

The 19th century witnessed a great technological revolution, resulting in a development of new instruments, procedures and theoretical knowledge. Birth became easier to perform. In 1829, a systematic midwifery education for non-professional women was introduced in Paris and in 1876, after considerable debate, the National Center for Maternal and Infant Health was established. At the same time, doctors of obstetrics were reduced to a secondary, and even tertiary role in obstetrical care. In the following centuries, the trend for a reduction in the level of obstetric care was evident in Belgium, France and the United States, with a tendency towards a marginalisation of birth attendants.Q: Forcing hyperlinks in markdown I'm using the pandoc converter from pypi, along with latex or pdflatex. If I use the latex interface with the default configuration (which uses pandoc), hyperlinks don't show up: citation-examples: - author: "My name" url: title: "Title" date: "2016" text: "I'm a text" par: \frenchspacing - author: "My name" url: title: "Title" date: "2016" text: "I'm a text" par: \frenchspacing Does anyone know how to force the hyperlinks to show up (eg: it doesn't work with the two \url{} lines)? A: You can use the pandoc-ref-latex extension. From the pandoc-ref-latex README: In order to get hyperlinks in citations working, the pandoc-ref-latex extension must be used. For example, instead of the following, the \url{} is replaced with a suitable hyperlink: - author: "My name" url: http 2d92ce491b
