1. If you do not know your system is running XP, use a Windows Update or the "about" function in the control panel to find out. 2. For this fix, use the Windows XP MediaIp set, but change the font to Courier New. 3. Run the "3.dll" file that you just downloaded. 4. Optionally, run the Vista Visual Styles Pack and change the fonts, theme and icons in the control panel (see notes for more information on this). 5. After all changes are complete, close the program and reboot the computer. References Category:Windows-only software Category:Windows-only freewareThe present invention relates to a coupler which can be attached to the female terminal of a terminal block, and more particularly to a coupler which is made in such a manner as to be connected to the female terminal of the terminal block by means of a fastening tool without damaging the female terminal and to a method for the production of the coupler. The terminal block is an assembly of a female terminal and a male terminal in the form of a pair. The female terminal has a cylindrical portion and a crimping portion provided at one end of the cylindrical portion. The male terminal has a cylindrical portion which is inserted into the crimping portion of the female terminal, and a crimping portion provided at one end of the cylindrical portion. When the female terminal and the male terminal are coupled together, the crimping portion of the female terminal is crimped by the crimping portion of the male terminal. The terminal block is used to fasten a wire to the female terminal of the terminal block. In a case where a wire to be connected to the terminal block is a very thin wire, it is preferred to employ a female terminal in which a gripping portion is provided at the crimping portion of the female terminal, since the crimping of the female terminal is carried out by the crimping portion. The female terminal of the terminal block may be inserted into a hole of the male terminal when the male and female terminals are coupled together. In this case, the female terminal and the male terminal are respectively held in their respective positions by a lock mechanism which is attached to the male terminal. In the female terminal having the gripping portion, the crimping portion is provided at the end of the
