Translate a Document Type Definition (DTD) into a XML Schema (REC-xmlschema-1- [Listed at the W3C XML Schema Site] 20010502). The translator can map meaningful DTD entities onto XML Schema constructs (simpleType, attributeGroup, group), i.e. the XML document model is not anonymized. The translator can also map DTD comments onto XML Schema documentation nodes in various ways. Requirements: ? Java Runtime dtd2xsd Description: Translate a Document Type Definition (DTD) into an XML Schema (REC-xmlschema-1- [Listed at the W3C XML Schema Site] 20010502). The translator can also map DTD comments onto XML Schema documentation nodes in various ways. Requirements: ? Java Runtime dom2t Description: Create a DOM from an XML Schema (any XML Schema model). This is the inverse of xsd2dom, i.e. xml schema2dtd uses xsd2dom to check the correctness of a DOM created from a DTD. The function behaves like xsd2dom, but element names may be of arbitrary length. Requirements: ? Java Runtime dtd2dom Description: Create a DOM from an XML Schema (any XML Schema model). This is the inverse of dom2t, i.e. xml schema2dtd uses xsd2dom to check the correctness of a DOM created from a DTD. The function behaves like xsd2dom, but element names may be of arbitrary length. Requirements: ? Java Runtime xsd2xml Description: Parse an XML Schema into an XML document. It is assumed that the XML Schema contains a well-formed XML document. The actual document fragment is not modified. Requirements: ? Java Runtime dom2t Description: Create a DOM from an XML Schema (any XML Schema model). A Java Package that includes TranslateDTD2XSD parser and TranslateDTD2XSDWriter classes. This program translates an XML document definition into a set of XML Schemas, using the W3C XML Schema DTD Definition. TranslateDTD2XSDWriter class should export a DTD Definition into an XML Schema definition. The TranslateDTD2XSDWriter class is based on the TranslateDTD2XSD class. This package implements the AbstractTranslator interface. AbstractTranslator is an abstract base class and provides the methods which should be implemented by Java packages which translate a DTD into a set of XML Schemas. TranslateDTD2XSD This package includes classes that translate a DTD into XML Schema specifications (called TranslateDTD2XSD classes). Example Usage: This package consists of a set of Java classes. The TranslateDTD2XSD package is composed of the following classes: TranslateDTD2XSD TranslateDTD2XSDClass TranslateDTD2XSDWriter TranslateDTD2XSDParser Se estiver no site da UFRJ, clique aqui: Algum acesso pela Internet? XML Schema Processor (xml-schema-processor.xsd). Overview: A XML Schema Processor (xml-schema-processor.xsd) is a Java class with two main methods: The first method is translatedDTD(DocumentTypeDefinition document) which takes a DocumentTypeDefinition from a DTD file to an XML Schema document. The second method is translatedCatalog(DocumentTypeDefinition document) which takes a DocumentTypeDefinition from a catalog file to an XML Schema document. The DocumentTypeDefinition to be translated might come from an XSD file or from a DTD file, or from a catalog file. Input: The input for the translations can be a DocumentTypeDefinition from a DTD file, from a catalog file or from an XSD file. Output: The output for the translations is always an XML Schema document. NOTE: The contract for the input documents is 1. the XML Schema or XSD document 2. the DTD file 3. the catalog file Facts: The output contains (1) the XSD document; (2) the DTD document; and (3) the catalog file. Changes: This is the first release of this version of xml-schema-processor.xsd. It is superseded by the new version xml-schema-processor2.xsd. Fixes: Compared with the version xml-schema-processor.xsd, the versions xml-schema-processor2.xsd and xml-schema-processor.xsd-1.0.1.tar.gz are monolithic. Both xml-schema-processor.xsd and xml-schema-processor2.xsd contain the translator, based on the content of xml-schema-processor.xsd. The catalog file has been moved to the directory \$JAVA_HOME/lib/xml/catalogs/xsd_catalogs. The DTD file has been removed from the directory \$JAVA_HOME/lib/xml/catalogs/xsd_catalogs. The DTD file has been removed from the directory \$JAVA_HOME/lib/xml/catalogs/catalogs. Both the catalog file and the DTD file are now used to
