Eclipse RCP projects make it easy to create applications with an integrated user experience, such as the ability to drag and drop content, show and hide UI elements, and provide context menus. However, the initial development of these projects tends to be a complicated process that requires substantial knowledge about the UI editor and the OSGi lifecycle. The Framework is built on the open Web technologies HTML5 and CSS3. With SAPUI5 you can connect the user interfaces to back-end services and data using standard Web technologies such as AJAX, JSON, JSON-P, SOAP, REST, and Web Services. SAPUI5 is already running in production at SAP companies and within SAP's partner ecosystem. Also, make sure to take some time to reflect on what you've learned. The paper is not the end. You learned a great deal and you now have the opportunity to share that learning with your classmates. You may not be the first person to read the paper and for that, we all share some responsibility. But now is the time to take stock of what you've learned. Put yourself in the shoes of the student who will be reading your paper. How would you judge the quality of your writing? How would you judge the quality of the arguments you put forward? How would you judge the quality of the evidence you presented? What strikes you as the most important contribution you've made to the field of literature and history? Hannah Arndt teaches History and Literature at University of Nebraska-Omaha. She was a student in this very course, and you can find her in the comments section below. via Theorizing the Humanities

The government has ordered the construction of a nearly \$1 billion, multi-billion-dollar expressway and train line through the southern Indian city of Chennai, less than two weeks after Prime Minister Narendra Modi suggested that the city was “too polluted” to have a subway. The move, which is expected to cost up to Rs. 54,000 crore (\$8.6 billion), has drawn widespread protests from local residents and environmental groups who have said the new lines would destroy land, harm biodiversity and exacerbate air pollution, instead of reducing it. The decision, which was announced on Saturday by the transport minister, Nitin Gadkari, came after Gadkari had travelled to the southern state of Tamil Nadu 1d6a3396d6
