**Star Track SR 150 Receiver Upgrade Software**

[Download](#)

I have a Star Track SR 150 digital satellite receiver. I would like its software to update the database. could you if you have, please let me know how to do it. I downloaded the latest version, but it doesn't have a file extension. Is the file manually updated, or is it just a software update that can do the job? Refresh Thanks You must use the update plugin to update the software. To do this, you need to download the update plugin, register your receiver at <http://www.startrac.com/portal/startrac.html>
