FIFA 22 introduces a new game engine that is built around PlayStation 4 Pro's enhanced hardware. The game engine features more detailed shadows, higher-fidelity character models and improved lighting. The engine is also built around a new physics system that reproduces impacts, collisions and player movements more realistically. For the first time, players will have access to two complete seasons of Premier League content. FIFA 22 releases with over 150 teams and over 2,500 players, but players can edit all rosters and register 2,000 new kits. View the Screenshots here. For detailed information, visit the Official Site. FIFA 22 for PS4 includes two play modes: Online Seasons and The Journey. Online Seasons allows the player to play against other players online on a season to season basis. This mode includes online lobbies where players can search for a friend to play against. Players can earn a variety of rewards, including unique player faces, items and apparel from the FIFA Vault. More in-depth rewards can be unlocked via the Skill Tree in Online Seasons and the Journey mode. The Journey will see the player living the life of a real footballer on the pitch with custom traits and players from real-world sports (e.g. Nelson Acosta from the Colombian National Football Team). As the player rises through the ranks, he will earn trophies and customize his player profile. One of the main reasons this mode was created was to offer a deeper experience, in the style of The Journey modes found in sports like NBA 2K and NHL. The Journey will feature 50 career experiences, ranging from being a first-team player at your childhood football club, to playing in the UEFA Champions League. Depending on the actions of the player, the player will be able to win contracts and challenge for trophies. In the
