Integrated circuit fabrication technology is largely dependent on the formation of a variety of device features such as metal wirings, diffused junctions and transistors. Integrated circuit fabrication is presently applied to the fabrication of monolithic integrated circuits and hybrid integrated circuits. Thin film transistors are presently fabricated according to a variety of processes, including crystalline silicon transistor fabrication processes and polycrystalline silicon transistor fabrication processes. Polycrystalline silicon transistor fabrication processes use a low pressure chemical vapor deposition process to form silicon dioxide and a subsequent process to form polysilicon. Thin film transistors fabricated according to polycrystalline silicon processes exhibit

Comments about PDF  
I found your blog URL  
on twitter and was  
trying to find a way to  
say thank you as a  
new follower and I  
came across your  
blog. It's a great way  
to meet other like  
minded people.Q:  
Laravel - Can't access  
image through URL I

---

have a Laravel project where I have a form which has an image upload. I also have a route defined so that I can access that image URL. This is my route:

```
Route::get('/img/{photoName}', function($photoName){ $path = Storage::disk('local')->url($photoName); return $path; });
```

This is where I use the

---

image for display:  
imagePath }}" />  
When I preview the  
page, I can see the  
name of the image, so  
I know that the name  
is correct, and the  
image is stored, but  
when I open the URL,  
it returns this: Not:  
Am I doing something  
wrong? A: I guess  
you'll have to alias  
the route with the

---

same name.

```
routes/web.php Route  
::get('img/{photoName  
e}',
```

```
[...])->name('img');
```

Not the best solution,  
but its the only way to  
get round what is  
happening. Read  
more about aliases in  
the Laravel docs And  
to get the correct  
path of the image you  
can use

---

Storage::disk('local').

Q: How can I output  
cURL commands  
through Bash? I want  
to use cURL  
commands like the  
ones below to connect  
to VPN servers. curl  
--retry 3 -m 5 --silent  
--user  
akamai.com:akamai  
-vvv -X PUT -T  
var/vpn/vpn\_config.txt  
--data-urlencode "prof

---

```
ile_password=mySecretPass&profile_username=myUsername" -k  
curl --retry 3 -m 5  
--silent --user  
ecoturke.net:ecoturke  
-vvv -X PUT -T  
var/vpn/vpn_config.txt  
d0c515b9f4
```
