“It’s much closer to life,” says Foriers. “When you’re playing the game in motion capture mode, the player feels like they are playing the actual game. The animations are fantastic. When you look at players, they feel more real than ever before and it also makes it so much easier for us to implement new animations.” “The new animations are great,” says Cheung. “They give the players a more powerful and dynamic feel to their animations. We’ve added an aerial animation to players that is really spectacular. They look really natural and real.” Multiplayer Online “Connectivity is not just in the console,” says Cheung. “We want to improve the network to

ensure a great experience for the player. At the game's launch the network quality will be superior." Exclusive to PS4 (also Xbox One and PC) will be a new online suite called PlayStation Plus (PS+). Players will need to purchase a PS+ subscription to access the network's online suite. "PS+ extends the benefits of PlayStation Network, such as cloud saves, instant video and online gameplay, to all players of PlayStation games," says Foriers. "PS+ members will get all the benefits of their membership and we are adding lots of new features to the online offering." In a first for FIFA, the PS4 version of the game will be playable offline (through a dedicated menu option) in all international regions. "Offline play

means the game is playable on a single PS4 system without the need for internet connectivity,” says Foriers. There’ll be plenty to do with the new PS+ suite, including new features such as cross-platform friend lists, online matchmaking, text chat, in-game voice chat and an online marketplace for players to buy and sell items. This new suite is not a mandatory download, but players will have the option to download it as part of a subscription. The PS4 will also feature "Instant Game Resume" which, as the name suggests, allows players to resume their latest game state after being disconnected from the network. Expect a newly streamlined user interface (UI) across all platforms, including PS4 Pro.

The UI will be skinned to match PS
