"No, there are no cheats".Q: How do I find out where in my code Magento is generating SQL after a specific action? I am using Magento's layout editor to change the layout of my Magento store. I am using the "Filter By Condition" setting to find out what was added or modified. However, in this filter I am getting "After Actions" as a listing. Does anybody know how to find out the SQL that was modified? A: Well, I found the answer myself... Looking in app/code/core/Mage/Sales/sql/sales_setup/mysql4-install-1.6.0.0.php and app/code/core/Mage/Sales/sql/sales_setup/mysql4-upgrade-1.6.0.0.php, I found out that there are SQL statements for the two different events. For reference: Mage_Sales_Model_Mysql4_Setup_Upgrade::_afterRun (1.6.0.0) Mage_Sales_Model_Mysql4_Setup::_afterRun (1.6.0.0) So you can change what happens during the install or upgrade. The SQL doesn't provide the information on how to do this however, as far as I can see. if_nil(response, [@body])(@statusMessage) { [CMSWeakProxy proxyForObject:response.connection]; NSString* originalBody = _proxyConnection.originalRequest.HTTPBody; _proxy
