* www.adobe.com/products/photoshop # Essentials for the Graphic Arts Profession We use Photoshop to correct and improve the appearance of media projects and to prepare them for print. Certain topics are covered in depth in this chapter for best practices in the field. ## Graphics Programs There are a variety of graphic design programs available to those who create images, from simple programs such as Photoshop Elements and Paint Shop Pro to

complex applications such as Illustrator and Adobe InDesign. In an ideal situation, a designer is able to create an image with a program and use the output of that image in a variety of other programs. Most of these programs also enable the designer to integrate their work into their web pages with templates and web-based programs. The most popular programs can be found on manufacturers' websites. Figure 10-1 shows some of the most popular Adobe programs.

****Figure 10-1:**** Adobe's Creative Suite of applications.

Photoshop Elements is a simple program that enables you to create and retouch images and modify graphics on paper. It is an excellent tool for beginners and is free! The Adobe Illustrator program is a very versatile and powerful graphics program for creating and manipulating vector images. It is extremely popular in the field and has many valuable plug-ins available.

Adobe InDesign is also a very powerful tool for creating pages, including integrating media into the pages with templates. Adobe Creative Suite is a collection of programs that allows you to

make a wide variety of graphic materials. ## Image Curation

When you're working with images, you want to make sure that the images that you use are clean and properly represented in the final composition. The previous sections in this chapter explain the best practices in image manipulation in an understandable manner.

Although the following sections give you tips on creating good images, I don't discuss digital manipulations for two reasons: *

The practice of manipulating digital images is an overrated topic: Good images can be

created without a complex procedure. Even though there are a variety of digital tools for manipulating images, like Photoshop, the skill set required for using these tools is an extreme complexity. In addition to requiring a broad set of skills, the processes for manipulating images often involve using a sophisticated palette of filters and adjustments. Simply put, these tools can be overwhelming and require a ton of time to work with. I'd rather show you how to improve your images and use an understanding of the

It's been a long time coming. After years of soundproofing their house, staking out construction jobs, and swapping secret cell phones, Jason and Tina Mueller watched with growing anxiety as their own home on Calvert Street finally went up for sale. With the opportunity to buy a house with room for their growing brood, their dream became a reality in February. "I have to find a way to get eight adults into it," said Mueller, 36. Mueller and his real

estate agent, Jeffrey Lendvai, have spent months working on finalizing details. By April, they plan to take a look in their new, and nearly 1,000-square-foot, house for the first time. The house is nearly finished. It has two bedrooms upstairs, one has a couch, the other has cots, and Lendvai estimates that it could accommodate up to eight children. Along with the home's spaciousness, Lendvai said the other selling points are its bright and airy feel, four-season sunshine, its proximity to local schools, shops and public transportation, and its ability to

accommodate a new baby boy. Lendvai, the owner of RE/MAX Multi-Real Estate, said the site of the house is an important factor in its appeal. "It's a unique property. You can't find a lot like this in the neighborhood," he said. Story continues below advertisement Other features of the home include: A wood-burning stove in the living room An in-ground pool A rock garden A long deck running along the back of the house that overlooks a residential neighborhood Separate entrances for each of the rooms, so that the house can be inhabited by just one or two

families at a time And, of course, a great deal -- expected to sell for no more than \$400,000.

Mueller and Lendvai said they don't expect to rent out the house, and they don't see any other family moving in. But they've accepted the fact that there will always be at least one or two large families nearby, and that they will always live in the shadow of their neighbour.

"We've been living in a 5,000-square-foot house with the idea that we would get bigger," said Mueller, who works for the Department of National Defence. He and his wife

Q: Subset sums problem Given 3 subsets X, Y, Z of $\{1, 2, 3, \dots\}$ and the sum $S = X \cup Y \cup Z$ what is the probability that X has sum more than Z ? A: I'm not convinced that the answer given in the book you quoted is correct. The book says that the probability is $p = \frac{\binom{n-k-1}{k-1}}{\binom{n-3}{k-3}}$ which is correct, but it says it is $1 - 2^{-n}$, whereas the actual probability is $1 - \frac{1}{n}$. I think the solution should be $p = \frac{\binom{n-k-1}{k-1}}{\binom{n-3}{k-3}}$

$\binom{n-k-1}{k-1} - \binom{k-1}{k-2}$

expands: Writers, editors, and more Today, we're officially opening up our Writers Wanted and Editorial positions. In both cases, we're looking for people who love reading, writing, and creating media. Writers Wanted Write story ideas for various GeekDad.com properties. There are no deadlines on that front, and the ability to have a regular slot at the site, albeit temporary and unpaid, is not required. You're also not required to be an expert in comics, video games,

and literature; all you have to do is love those things and can turn that love into compelling material. Editorial Currently, the editorial staff consists of me, the head GeekDad, and the fact that we don't seem to be anywhere near the end of the expansion process. We need to build out the staff of our Media Relations department (the folks who handle press releases, communications with writers and the like), and we need to build out the media team's business into the kind of company it needs to be for the specific needs of a website like GeekDad.

Our primary skills are in development and content generation. We're looking for individuals who can inspire us to put out high quality, entertaining, and informative content. There are no deadlines, and this
