Export to EBS custom fields: Export Oracle Apps 11i/R12 custom field data to an EBS custom field file. Import from EBS custom fields: Import data from

Forms Data Loader

World's leading spreadsheet technology merged with Internet's next generation business tool! Microsoft Office allows you to do virtually anything you can imagine, but not all of your work can be done easily from within Word, PowerPoint, or Excel. With a legacy data import utility, you can quickly and easily import data from any number of data sources to a business applications. Forms Data Loader is a powerful, universal software utility that allows you to import data from text files or Microsoft Excel spreadsheets into any application that can consume XBRL data, such as Oracle Apps 11i, 12c and R12. It's easy to use. Just select the file you want to import, select the database you want to receive the

data in and click to import. You can even set up automatic imports, creating these from any size and shape of template. XBRL data is a de facto standard for organizing financial and business information. Forms Data Loader allows you to import XBRL files into any of the applications that can receive XBRL data. The utility includes templates for QuickBooks, ERP9 and Oracle Apps 11i/12c/R12, giving you the ability to quickly generate reports for all of these accounting applications. Also included in the product is a built-in HTML forms processor for Oracle Apps Self Service Forms. Forms Data Loader allows you to create and manage reports for any application that is an XBRL Consumer.
