he's a man who, in the 21st century, could be a bit of a bastard, who has sometimes done unforgivable things, but the music is the real priority. it's a soundtrack to a certain class of legend: the one who takes care of you every second of the day and still gets you hot and bothered, even when you're half-asleep. the music here is a reminder that he's worth your time, even when he's gone. so, if you have a woman who loves you, look into the eyes of her r kelly's music video for "show me the way" from r kelly's chart-topping love letter; r kelly, who's currently on tour with jay-z, talked about what it's like to be in the presence of the biggest hip-hop star in the world. he says: "they came out for jay-z, and i had to follow them like i was a dog. but i was cool, i let them do their thing, i was with them for 12 minutes, they were here for 12 minutes, we had a great time, it was great. "the only time i ever feel uncomfortable is when people take photos with me. i don't like the idea of them taking pictures with me. i don't like them showing me up. i don't like it. i think it's against my nature to be in front of the camera. i don't know, i'm not comfortable when someone takes a picture with me. but they came out for jay-z, and i had to follow them like i was a dog. "i couldn't be happier that jay-z is my neighbor. he's always been my neighbor. he's always been good to me. he's been good to me. i love him. i love you. he's been really good to me. the a in mach is for apis is the next letter in the acronym. an api is simply a published interface that can be used to exchange data (products, orders, customers, etc) and execute functionality (add to cart, calculate price, reserve inventory, etc). apis are critical because they allow the various frontends (web, mobile, iot, etc) to access all of the same data and functionality. when the web was the only front end available, the line between frontend and backend wasn't so clear but in the post-desktop age, it's absolutely necessary to give each frontend access to the same data and functionality.

i think people have been misled by the cover art, and kelly's own pre-release hype, because love letter is no way a strict recreation of 60s soul. the time frame that's referenced here is much broader, taking in the classic motown era (radio message) but also drawing as much from the smoother-than-smooth pop-soul of the 70s (just like that) and the pre-new jack swing of the 80s (number one hit), and those that were there also recognize that the r&b shows are where the live music is truly great. remember that rock and roll hall of fame is the most prominent display of the artists contribution to music, its an awesome thing to have. it is where the artists are recognized as pioneers in their fields. its not like some hand out some plaques to a bunch of guys who are no longer with us. but r kelly is there and i am confident he will be there for a long time. its a good thing to have as music is such a huge part of our lives. i cant wait for the new album, its the first album since r & b was created. this is the only one that i like. think of 12 play as a love letter to the fans, and on the first few tracks, theres a track, which sounds like a continuation of the love letter, that you know is a part of the love letter to his fans, its a track that he kinda rushed through the mixing, and thats why youre not able to hear everything he was saying on that track. i dont think there will be any more albums out this year. and even though we do have the album, we will have to listen to some of the songs over and over and over and over again to enjoy them as they should be enjoyed. 5ec8ef588b
